

BACK GROUNDS

CSS Background properties are used to add background effects for Elements.

1) Background - color

It is used to add background color of an element.

background-color : light blue;

2) Background - Image

It is used to specify image for an background of Element.

body { background-image : url (" "); }

3) CSS background - repeat

It is used to repeat the image both horizontally and vertically.

body { background-image : url (" "); }

<body>

<h1> Hello world </h1>

<p> Lorem </p>

</body>

→ Repeat only horizontally / Vertically.

```
body {  
    background-image : url ( " " );  
    background-repeat : repeat-x ;  
    }  
    or  
    vertically - repeat-y ;
```

→ No repeat

```
body {  
    background-image : url ( " " );  
    background-repeat : no-repeat ;  
    }
```

→ Add image on right top

```
body {  
    background-image : url ( " " );  
    background-repeat : no-repeat ;  
    background-position : right top ;  
    margin-right : 200px ;  
    }
```

→ background-repeat : space ;

→ background-repeat : Repeat ;

→ background-repeat : round ;

→ background Attachment : fixed ; Scroll ;

→ background

CSS - background - attachment

This property specifies whether the background image should scroll or be fixed.

fixed

```
body {  
    background-image : url ( " " );  
    background-repeat : no-repeat ;  
    background-position : right top ;  
background background-attachment : fixed ;  
}
```

Scroll

```
body {  
    background-image : url ( " " );  
    background-repeat : no-repeat ;  
    background-position : right top ;  
    background-attachment : scroll ;  
}
```
